

## What Seattle Proposition 1 Will Do For You

We all deserve to get where we need to go safely and efficiently. For the last 18 years, Seattle has relied on voter-approved levies to help build and maintain our city's critical transportation infrastructure. The current levy is about to expire, and **Seattle Prop. 1 is an 8-year, renewed investment in our city's roads, bridges, sidewalks, and transit.**

### Across Seattle, Prop. 1 will:

- Repave 15 of our most heavily used roads
- Make our city's most dangerous roads safer
- Repair and upgrade our bridges to extend their life
- Fill potholes within 72 hours
- Build 350 blocks of new sidewalks
- Create safe routes for kids to walk and bike to school
- Speed up buses and improve lighting, visibility, and safety at bus stops
- Improve access to light rail
- Enhance safety on dedicated bike lanes
- Plant thousands of new street trees

### In West Seattle and Southwest Seattle, Prop. 1 will:

- **Build out the sidewalk networks in West Seattle**, with at least 22% of the new sidewalk investments in Prop 1 going to District 1!
- **Complete major street repaving projects** on 35th Ave SW, Fauntleroy Way SW, and Olson PI SW / 1st Ave S to repair these roads while enhancing safety and accessibility for people walking and biking
- **Reduce injuries and fatalities on 4th Ave S through SODO**, where 12 people have been killed in car crashes in the last 4 years
- **Improve access to future light rail stations** along SW Alaska St and SW Oregon St
- **And much more!**

**Vote YES on Seattle Prop. 1 to make it safer and easier to get around *your* community!**
